

+GF+ Machining Solutions UK, Partner with NCG CAM Solutions Ltd for their Mikron Milling Machines

About the Company

+GF+ Machining Solutions is a market leader in the sales and support of advanced, high-performance machine tools. Their machine tool technologies are used extensively in the aerospace, defence, medical, oil/gas, power generation and motorsport sectors, to name but a few.

+GF+ customers in the UK and Ireland are numerous and diverse and include many blue-chip OEMs, Tier 1 and Tier 2 companies, precision component subcontractors and precision mould tool and die-makers.

Benefits of Partnering with NCG CAM

- ✓ Partnering with **NCG CAM** software gives added value to customers as can also advise and supply CAM software, so the customer has a single source supplier.
- ✓ **NCG CAM** is compatible with most high performance CNC milling machines.
- ✓ Post-processors are readily available.
- ✓ **NCG CAM** is written for high speed machines, so reduces cutter wear too, saving customers money.
- ✓ Ease of use makes the training of users very easy.
- ✓ Partnering with **NCG CAM** software opens the door to additional sales leads for the Mikron High Speed machines.

“+GF+ Machining Solutions mission is to provide innovative manufacturing solutions, offering a product range that covers multiple technologies including Milling, EDM and Automation. Our aim as a solution provider is to help +GF+ customers to produce their products more efficiently by introducing them to our advanced production equipment and manufacturing methods. In order to support this, we partner with select tooling and software providers, including NCG CAM.”
