

Nicolás Correa Machine Tools Partner Globally with NCG CAM Software

About the Company

Founded in 1947 and dedicated to the design and fabrication of medium and large size milling machines, is the headquarters of the Group NICOLÁS CORREA.

With more than 1000 Double Column and 600 Travelling Column Milling Machines sold around the world, Nicolás Correa is one of the European leaders in milling solutions to answer the demands of the most demanding production tasks, such as manufacturing dies and large moulds, monolithic elements for the aerospace, railway, energy and general mechanical sectors.

Currently, **Nicolás Correa** exports 90% of its production to the main industrialised countries, such as Germany, China, France, Italy, Great Britain, USA, Canada, etc., through a wide network of distributors and subsidiary branches which provide direct, personal contact with the customer.

Benefits of Partnering with NCG CAM

- ✓ Partnering with **NCG CAM** software gives added value to customers as can also advise and recommend CAM software, as using to produce parts in the Nicolas Correa Technical Centres
- ✓ **NCG CAM** is able to work with very large part files without crashing, saving time and adding reliability
- ✓ Post-processors are readily available
- ✓ Ease of use makes the training of users very easy

“Nicolás Correa’s company mission is to provide milling solutions to our customers ensuring always the highest level of technical support, either in after-sales or in application engineering services. **NCG CAM** helps us to show our customers an optimised milling process, generating clean toolpaths in an easy way with high levels of reliability.”

Javier García - Marketing & Applications Engineering Director, Nicolás Correa
