

Solver in Russia, Provide NCG CAM Software Alongside Their CNC Machine Tool & Tooling Products

About the Company

Established in 1993, Solver in Moscow, Russia is partnering their wide range of machining centres and tooling with NCG CAM Solution Ltd's CAM software, NCG CAM.

SOLVER's primary course of activity is to create efficient business for engineering enterprises by introducing the following:

- ERP and PLM systems
- CAS/CAD/CAM/CAE systems
- Machines Tools & Tooling

Benefits of Partnering with NCG CAM

- ✓ Partnering with **NCG CAM** software gives added value to customers as can also advise and supply CAM software, so the customer has a single source supplier
- ✓ **NCG CAM** is compatible with most 3-axis to 5-axis CNC Milling machines
- ✓ Post-processors are readily available
- ✓ **NCG CAM** is written for high speed machines, so reduces cutter wear too, saving customers money
- ✓ Ease of use makes the training of users very easy
- ✓ Partnering with **NCG CAM** software opens the door to additional sales leads for Solver

"The SOLVER company mission is to create Intelligent Production at Russian machine building enterprises, which means to create highly efficient and highly profitable production. We are helping our customers - leading enterprises, producing competitive products - to realise it more efficiently by introducing advanced production equipment and software, including NCG CAM."

- Radislav Birbraer, MSc in Engineering, Honored Russian Inventor, Solver, Chief Designer
